What were the Fund costs for the past year?

(based on a hypothetical \$10,000 investment)

Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Clifford Capital Partners Fund - Super Institutional Class Shares	\$88	0.82%

How did the Fund perform last year?

- For the period of October 1, 2024, to September 30, 2025, the Clifford Capital Partners Fund, Super Institutional Class Shares (the “Fund”) returned 15.40%.
- In comparison, the Russell 3000® Index (broad U.S. market) returned 17.41% for the same period, while the Russell 3000® Value Index (Fund’s benchmark) returned 9.34%.

What key factors affected the Fund’s performance?

- U.S. stocks rose strongly, especially companies with higher growth rates, higher liquidity, and those exposed to generative artificial intelligence.
- The Fund did not gain as much as the broad U.S. market, driven mostly by underperformance in its Technology, Health Care and Consumer Staples stocks, partially offset by outperformance due to sector underweights in Real Estate and Materials stocks.
- The Fund’s focus on investing in companies with lower valuations and lower growth profiles detracted from the Fund’s performance relative to the broad market.
- Versus the Fund’s benchmark, however, strong individual stock selection led to outperformance.
- Additionally, frequent market rotations—early-2025 surge in artificial intelligence stocks, mid-2025 rebound from tariff-related volatility and later-2025 speculative run in high-beta stocks— created an environment that alternately rewarded and penalized value stocks, making relative results highly timing-dependent.
